

STAKEHOLDER REVIEW

NMS Product Catalog & Packaging System

A reconstructed portfolio, product-data foundation and four-format packaging direction for the next stage of online-store development.

SCOPE

247 tracked products and variants

SOURCE BASE

NMS brochure + May 2017 price lists

REVIEW DATE

17 August 2026

What has been reconstructed

WORKING DRAFT — PENDING VALIDATION

A complete starting point — not a publishable catalog.

The historical range has been translated into a structured product master with neutral descriptions, packaging direction and approval controls.

27

Core coded rows

Historical SKUs, barcodes, NAPPI references and 2017 pack configurations.

71

Legacy products

Additional brochure products and variants tracked with draft internal codes.

149

Crude-herb lines

Simples requiring taxonomy, grade, origin, safety and testing validation.

No SKU should be activated until its current formula, regulatory category, label, barcode, price and stock are verified.

Source hierarchy: 2017 price lists for historical codes; brochure for categories, legacy variants and packaging references.

The reconstructed range is broad, but only a small portion carries historical code-level detail.

Core coded candidates

Retail and trade configurations documented in the May 2017 price lists.

HOLD FOR CURRENT VERIFICATION

Legacy formulated range

Teas, tablets, capsules, topicals, hair care, oral care and beverages found in the brochure.

PRIORITISE AND VALIDATE SELECTIVELY

Crude herbs / simples

A high-volume botanical list that needs a different sourcing, quality and enquiry workflow.

SEPARATE OPERATING MODEL

Core online-store candidates

WORKING DRAFT — PENDING VALIDATION

The 27 code-bearing rows are the strongest starting point because they contain historical identifiers and pack configurations.

27 / 27 ON HOLD

Product family	Historical SKUs	Formats	Examples	Status
Hermes teas	6 rows	Retail + six-unit cases	No. 7, No. 8, No. 11	Hold
Nature's Own & beverages	4 rows	Tea packets, filter bags	Dandelion, two tea blends	Hold
Lexan	10 rows	Powder, tablets, trade cases	57 g; 20s, 50s, 100s	Hold
Other herbal products	7 rows	Tablets, powder, seasoning	Ginseng, Cystosan, Fo-Ti	Hold
Known data conflict	1 repeated barcode	Lexan 57 g bulk case	12-pack barcode repeated on 144-pack source row	Resolve

Historical prices and NAPPI references remain archival; they are not current commercial or regulatory confirmations.

Legacy range opportunity

71

additional products and variants

The brochure reveals a much wider legacy portfolio than the code-bearing price list.

DRAFT-LEG codes exist only for tracking. They are not official NMS SKUs.

WORKING DRAFT — PENDING VALIDATION

Medicinal tea compounds

Historical 70 g blends across numerous purpose-led names.

Topical products

Six ointments plus hair lotions, shampoo, tonic and Adiantine.

Tablets & capsules

Additional pack sizes, immune products, Vegetex and Antifect.

Consumer products

Dandelion granules, mouth wash and a 100 g Herb-A-Lick variant.

Recommended route: choose a small set of commercially relevant products, then validate each against current stock, formulation, safety, regulatory status and manufacturing capability. Do not attempt to revive all 71 simultaneously.

Crude herbs require a separate model

WORKING DRAFT — PENDING VALIDATION

149

botanical lines — enquiry only

The brochure list is a historical assortment, not a verified current inventory or approved ecommerce range.

SEPARATE CATALOG • SEPARATE QA •
SEPARATE RELEASE GATE

Identity & taxonomy

Source spellings include incomplete, outdated and likely OCR-affected botanical names.

HIGH VALIDATION NEED

Quality specification

Plant part, cut grade, identity testing, contaminants and microbiological limits are absent.

HIGH VALIDATION NEED

Safety & restrictions

Some botanicals can require use restrictions, warnings or may be unsuitable for consumer sale.

PROFESSIONAL REVIEW

Commercial model

Pack weights, supply availability, origin, pricing and minimum order quantities are unknown.

ENQUIRY-LED ONLY

Proposed four-format packaging system

WORKING DRAFT — PENDING VALIDATION

NMS PACKAGING SYSTEM

Draft starter concept • dimensions, substrates, copy and compliance status: To be confirmed

1. Folding carton

Tea, powder or bottle outer carton

Tamper seal / leader requirement: TBC
Board grade and print finish: TBC

2. Tablet bottle

White HDPE-style legacy format

Child-resistant / tamper-evident closure: TBC
Bottle size, desiccant and induction seal: TBC

3. Herb / tea pouch

Loose botanical and blend format

Food-contact liner and moisture barrier: TBC
Resealable zipper / heat seal requirement: TBC

4. Trade case

Six- or twelve-unit wholesale pack

Case barcode: To be confirmed
Dimensions / mass: To be confirmed
Storage / handling: To be confirmed
Lot traceability: To be confirmed

Concept only — no therapeutic claims. Final artwork must use the approved formulation, current legal particulars, barcode, batch controls and regulatory wording.

1. Folding carton

Teas, powders and bottle outer packs.

2. Tablet bottle

Solid-dose retail packs with closure and seal requirements to be confirmed.

3. Herb / tea pouch

Loose botanicals and blends with food-contact barrier requirements.

4. Trade case

Six-, twelve- and bulk-unit configurations with master-case traceability.

Concept only: dimensions, substrates, closures, legal copy, labels and compliance wording remain to be confirmed.

What must be confirmed before publication

WORKING DRAFT — PENDING VALIDATION

The master workbook exposes the missing fields; all eight control domains are still incomplete.

Control domain	Required evidence	Status
Identity	Approved name, form, net quantity, SKU, barcode and pack mapping	■ Hold
Formula	Ingredients, quantities, botanical identity, plant part, extracts, excipients, allergens	■ Hold
Quality	Manufacturer, origin, specifications, test methods, COA and batch controls	■ Hold
Safety	Directions, warnings, contraindications, interactions and adverse-event contact	■ Hold
Regulatory	Product category, permitted claims, NAPPI status and responsible-person approval	■ Hold
Commercial & logistics	Current price, VAT, margin, stock, dimensions, mass, storage, shelf life and shipping	■ Hold
Digital	Approved photography, title, descriptions, SEO metadata, alt text and publication owner	■ Hold

Release path and ownership

WORKING DRAFT — PENDING VALIDATION

Move a deliberately small launch set through five controlled gates before building the full online range.

01 Select launch candidates Choose priority products using current stock, demand, margin and brand fit. COMMERCIAL OWNER	02 Verify physical product Match pack, label, count, barcode and supplier/manufacture records. OPERATIONS + QA	03 Approve specification Lock formula, quality tests, safety data, regulatory category and claims. QA + REGULATORY	04 Finalise pack & commerce Approve artwork, current pricing, tax, inventory and logistics. BRAND + FINANCE	05 Activate and monitor Publish only the approved record; retain batch and change control. ECOMMERCE OWNER
--	--	--	---	--

Release gate: no product becomes orderable without a named approver and approval date.

Recommended pilot: 8–12 retail SKUs

Stakeholder decisions required

WORKING DRAFT — PENDING VALIDATION

Approve the launch scope

- ☐ **Priority product set**
Confirm the first 8–12 retail SKUs and whether any legacy products enter validation.
- ☐ **Crude-herb model**
Confirm separate enquiry-only treatment rather than standard consumer checkout.
- ☐ **Packaging direction**
Approve the four-format system as the basis for supplier quotes and artwork.

Assign accountable owners

- ☐ **Regulatory and QA lead**
Own formula, safety, claims, specifications and release approval.
- ☐ **Commercial data owner**
Own current pricing, VAT, stock, barcodes, margins and case configuration.
- ☐ **Brand and ecommerce owner**
Own photography, final copy, artwork, digital setup and ongoing change control.

Recommended decision today: approve a controlled validation sprint for the pilot range before committing to full catalog production.
