

INTELLIGENCE THAT RUNS YOUR WORLD

Business Intelligence Reports **2026**

Know exactly where your business stands online: against competitors, on Google, and inside the AI tools your customers now use. Plain-English reports. Executive-ready. Action-first.

Prepared for: Medium & enterprise businesses, South Africa

Issued by: JB³ · Pretoria, Gauteng · hi@jb3ai.com · +27 71 969 1848 · jb3ai.com

Your customers have changed how they find businesses.

Has your business changed how it gets found?

Something quiet but decisive has happened in the last 24 months. Before they phone you, your customers now ask two machines about you: Google, and increasingly an **AI assistant** like ChatGPT, Gemini or Perplexity.

These systems already answer questions like *"best security company in Gauteng"* and *"is company Y reliable?"*, and they recommend specific names. **If your business is not found, cited and recommended in those answers, you are invisible at the exact moment a buying decision is made.**

Most South African medium and enterprise businesses have no idea where they stand. The information exists; nobody has ever put it in front of them in plain English.

THAT IS EXACTLY WHAT THESE REPORTS DO

Each JB³ report answers one executive question with verified data: where you stand, who is beating you, why, and what to do about it. No jargon. No hype. Just your position, your gaps, and your next move.

The AI Visibility Ladder — where does your business sit today?

The AI Visibility Ladder — Most established South African businesses sit at Stage 1 or 2: present online, but structurally invisible to the AI tools buyers now use. Every report shows your stage and the concrete steps to climb, and the businesses that move first will own Stage 4 in their category.

From a free sample to a clear plan, in five steps

You are holding step 2. This catalogue accompanies a real sample report, so you can judge the quality of the insight before you spend a rand.

Your journey — A deliberately low-friction process. The sample proves the value, your chosen report answers your question, and the strategy session turns findings into a plan. Implementation is scoped separately; you only ever commit to one step at a time.

Every report includes

- ✓ **Verified data** from independent analytics platforms and live testing. Every number has a source.
- ✓ **Plain-English findings** written for executives, not technicians. If a technical term matters, it is explained in one sentence.
- ✓ **Visual evidence:** charts, comparisons and scorecards you can put straight into a board pack.
- ✓ **A prioritised action plan:** immediate, short-term and long-term moves, ordered by impact per rand spent.
- ✓ **An optional walkthrough** where we take your leadership team through the findings and answer questions.

Every report answers a question executives already ask

One report, one question — Executives don't buy data; they buy answers. Each report in this catalogue is built around a single question leadership teams already ask, so the output is immediately usable in real decisions.

The report menu: choose the question you need answered

Digital Presence Scorecard ★

FROM R3,999

The recommended first step. One document, five scores, total clarity.

COVERS	Your full digital footprint scored across five dimensions: search visibility, AI visibility, website health, brand consistency and online reputation, benchmarked against your two closest competitors.
BEST FOR	Executives who want the complete picture in one read before deciding where to go deeper.
YOU RECEIVE	10–14 page scorecard, five-dimension radar chart, red-amber-green ratings, top-10 priority fixes.
SUPPORTS	Where to invest first; what to brief your team or agency on; budget motivation.
THEN TYPICALLY	One or two deep-dive reports on the weakest dimensions.

Competitive Intelligence Report

FROM R4,999

See exactly how your competitors win, and where they are exposed.

COVERS	Traffic, search authority, backlinks, engagement, content strategy and AI citations for you and up to eight competitors: who is growing, why, and which of their moves you can counter.
BEST FOR	Businesses in contested markets that suspect competitors are out-executing them online but cannot prove it.
YOU RECEIVE	15–20 page benchmark with competitive radar, full data tables, their strengths to copy and weaknesses to exploit.
SUPPORTS	Marketing budget allocation; positioning decisions; board-level competitive updates.
THEN TYPICALLY	A Search Opportunity Report to capture the demand competitors are harvesting.

AI Visibility Audit (GEO)

FROM R4,999

What ChatGPT, Gemini and Perplexity actually say about your business.

COVERS	Live testing of how AI assistants answer buyer questions in your category: whether you appear, what is said, whether it is accurate, and how often competitors are recommended instead.
BEST FOR	Any business whose buyers research before they call, which is now almost every business.
YOU RECEIVE	Documented AI answers with screenshots, a visibility score against competitors, and a roadmap to become the business AI recommends.
SUPPORTS	AI-readiness strategy; content investment decisions; brand-risk management.
THEN TYPICALLY	GEO optimisation work: structured content and data fixes that make AI systems cite you.

Search Opportunity Report (SEO)

FROM R4,999

The demand you are missing on Google, quantified in rands and rankings.

COVERS	What South Africans actually search for in your category, where you rank, where competitors rank, and the most valuable searches nobody has claimed properly.
BEST FOR	Businesses investing in marketing without knowing whether their website is even findable.
YOU RECEIVE	Keyword opportunity map with search volumes, current rankings, technical issues holding you back, and a 90-day capture plan.
SUPPORTS	SEO investment decisions; content planning; agency accountability.
THEN TYPICALLY	Targeted SEO and content implementation, in-house or with JB ³ .

Deeper diagnostics for specific decisions

Website Performance & Conversion Review

FROM R4,999

Is your website quietly losing you business?

- COVERS** Speed, mobile experience, technical errors and, most importantly, where visitors give up: confusing journeys, buried contact options, forms that kill enquiries.
- BEST FOR** Businesses whose website looks fine but generates few enquiries.
- YOU RECEIVE** Annotated findings with screenshots, severity ratings, and a fix-list ranked by revenue impact.
- SUPPORTS** Website rebuild versus repair decisions; briefing developers; conversion improvement.
- THEN TYPICALLY** A scoped website repair or rebuild project.

Brand & Reputation Snapshot

FROM R4,999

What the internet says about you when you are not in the room.

- COVERS** Reviews across Google, Facebook and HelloPeter, ratings against competitors, unanswered complaints, news and social mentions, and whether your brand looks consistent everywhere it appears.
- BEST FOR** Consumer-facing and service businesses where trust decides the sale.
- YOU RECEIVE** Reputation scorecard, sentiment summary, brand consistency findings, response priorities.
- SUPPORTS** Reputation management; review strategy; brand refresh decisions.
- THEN TYPICALLY** Review-generation campaigns and brand alignment work.

Industry Landscape Brief

FROM R4,999

Your market, mapped: players, trends and digital openings.

- COVERS** The structure of your industry in South Africa: who the digital leaders are, where customer demand is moving, and which market positions remain unclaimed online.
- BEST FOR** Leadership teams planning expansion, new service lines or market entry.
- YOU RECEIVE** Market map, trend analysis, competitor positioning table, identified whitespace opportunities.
- SUPPORTS** Strategic planning; investment cases; new-market decisions.
- THEN TYPICALLY** A strategy session and targeted reports on chosen opportunities.

NOT SURE WHICH QUESTION MATTERS MOST?

Start with the **Digital Presence Scorecard**. It scores all five dimensions at once and tells you, with evidence, exactly where a deeper report will pay for itself fastest.

Bundled intelligence, built around decisions rather than documents

Bundles combine complementary reports at a preferential rate and are scoped to your business before quoting. Each is designed to support a specific executive decision.

The Executive Snapshot

For leadership teams taking the first serious look at their digital position

INCLUDES	Digital Presence Scorecard + Website Performance & Conversion Review
ANSWERS	"Where do we stand overall, and is our website helping or hurting us?"
LEADS TO	A prioritised fix-list your team or suppliers can execute immediately.

The Visibility Suite

For businesses ready to be found on Google and inside AI assistants

INCLUDES	AI Visibility Audit + Search Opportunity Report + Digital Presence Scorecard
ANSWERS	"Can customers find us everywhere that matters, today and in the AI-driven future?"
LEADS TO	A combined SEO and GEO capture plan covering both search engines and AI tools.

The Market Position Suite

For contested markets where competitive edge decides growth

INCLUDES	Competitive Intelligence Report + Industry Landscape Brief + Search Opportunity Report
ANSWERS	"Who is really winning in our market, why, and what do we do about it?"
LEADS TO	A board-ready competitive strategy with costed, sequenced moves.

The Full Intelligence Picture

The complete diagnostic: every report, plus an executive strategy session

INCLUDES	All seven reports unified into one master document, plus a 90-minute strategy session with your leadership team
ANSWERS	"Give us the complete, evidence-based picture of our digital business, and a plan."
LEADS TO	A 12-month digital roadmap, quarterly re-measurement, and scoped implementation support.

What a JB³ report actually looks like

The sample attached to this catalogue is a real Competitive Intelligence Report produced for a real South African publisher. Below is the kind of evidence inside: every figure drawn from independent analytics, every chart board-ready.

Sample extract — Competitive Intelligence Report

Sample extract: competitive radar — One view, four dimensions: how a business compares to its market leader on reach, search authority, customer engagement and AI visibility. In this real example the subject matched the leader on nothing except engagement potential, the cheapest dimension to fix, and that single insight redirected an entire marketing budget.

Inside every report you will find

- ✓ **An executive summary** you can read in four minutes and act on in one meeting.
- ✓ **Benchmark tables:** your numbers next to the competitors you actually lose sleep over.
- ✓ **Radar, trend and comparison charts** that make the position unmistakable.
- ✓ **Strengths to copy, weaknesses to exploit:** a plain-English read on every competitor.
- ✓ **A phased action plan** covering immediate (0–30 days), short-term (1–3 months) and long-term (3–12 months) moves, with KPI targets so progress is measurable.

THE STANDARD IS THE POINT

We publish the sample openly because the reports sell themselves. If this is the quality we give away, imagine what the commissioned version answers about *your* business.

Consulting-grade intelligence, without the consulting-grade invoice

A comparable diagnostic from a traditional consulting firm typically starts at R50,000 and comfortably reaches R100,000 or more. The insight class is the same; the delivery model is not.

Same class of insight. A fraction of the entry price.

Value versus price — *JB³ pairs automated data collection at scale with senior human analysis and judgement. That is how consulting-grade intelligence reaches you at an entry price, and why the first report is deliberately the easiest decision in the process.*

Why the first report is priced to be easy

We would rather prove value than promise it. The entry report exists so you can judge our work on evidence instead of a sales pitch. If the report shows you nothing worth acting on, it has cost you less than a single day of a consultant's time.

If it does, the follow-on work pays for itself: visibility recovered, wasted spend stopped, demand captured.

WHAT THIS IS, AND WHAT IT IS NOT

This is not an automated printout. Every report is produced on real data platforms, reviewed by a senior analyst and written for your business specifically. The automation does the heavy lifting; the thinking is human.

Simple to start. Scoped to grow.

OPTION	INVESTMENT	DELIVERY
Digital Presence Scorecard The recommended first step	From R3,999 once-off	5–7 working days
Other single reports Any report from pages 4–5	From R4,999 once-off	7–10 working days
Bundled packages Four suites, page 6	Scoped & quoted at a preferential bundle rate	2–3 weeks
Consultancy & Business Accelerator Implementation, quarterly measurement, the 30–90 day organisational upgrade	Custom proposal after consultation	Ongoing

How engagements typically unfold

- ✓ **Step 1: Scorecard.** One accessible document shows you exactly where you stand.
- ✓ **Step 2: Deep-dive.** You commission the report that targets your weakest dimension.
- ✓ **Step 3: Strategy session.** We walk your executives through the findings and agree priorities.
- ✓ **Step 4: Implementation.** Optional. Scoped and quoted separately, executed by JB³ Consultancy (including the 30-to-90-day Business Accelerator) or by your own suppliers.

NO LOCK-IN, NO RETAINER REQUIRED

Every step stands alone. You can take any report to your own team or agency and execute it yourself, because the action plans are written to be supplier-neutral. Most clients ask us to continue anyway; that is the model working as intended.

All prices exclude VAT. Reports cover South African markets by default; multi-country scope quoted on request. Sample reports remain the property of JB³Ai and are shared for evaluation purposes. JB³Ai is the registered entity trading publicly as JB³.

The next move takes one email. **Start with the Scorecard.**

Tell us your website address and your two closest competitors. Within 5–7 working days you will hold a document that shows, with evidence, exactly where your business stands and what to do next.

If the sample attached to this catalogue showed you something new about a company that is not even yours, imagine what the commissioned version reveals about your own.
